humanⁿ neo40[®] professional

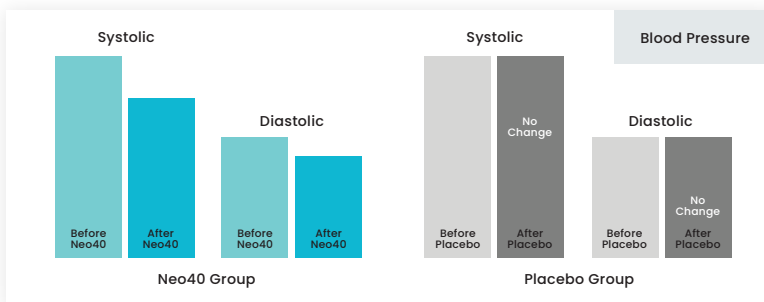

Clinical Strength Daily Heart & Circulation Formula

Real Science

- Patented technology from the University of Texas Health Science Center's Nitric Oxide Discovery Program.
- Demonstrated beneficial cardiovascular effects in (6) peer-reviewed, randomized placebo-controlled clinical trials.
- The most scientifically studied Nitric Oxide lozenge.

Clinically Studied Blood Pressure Support

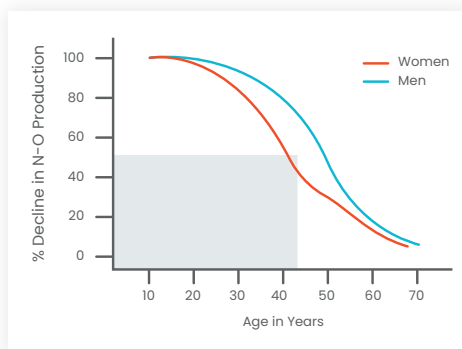

Subjects were not hypertensive

A clinical study was conducted on Neo40 to determine its effects on blood pressure that is on the higher end but still in the normal range. Biswas OS, Gonzalez VR, Schwarz ER. Effects of an oral nitric oxide supplement on functional capacity and blood pressure in adults with prehypertension. J Cardiovas Pharm Therapeu 2014, DOI: 10.1177/1074248414539563.

Your Cardiovascular Health Starts With Nitric Oxide

Nitric Oxide is essential to every breath you take. It's a gaseous molecule that allows your blood, oxygen, and nutrients to travel to every inch of your body efficiently & effectively.

However, there is a problem: Starting between the ages of 20-25, your body starts producing less Nitric Oxide than it used to.

Health Benefits

- Clinically studied to support healthy blood pressure
- Helps increase Nitric Oxide production by nitrite reduction & activation of eNOS
- Promotes vasodilation and efficient blood flow
- Supports cardiovascular health and healthy circulation
- Supports healthy endothelium function
- Trusted by thousands of medical professionals in their daily practice

Supplement Facts

Serving Size: 1 Tablet Servings Per Container: 60

Amount Per Serving	% Daily Value	
Vitamin C (as magnesium ascorbate and ascorbic acid)	100 mg	111%
Vitamin B12 (as methylcobalamin)	50 mcg	2,083%
Folate (256 mcg L-5-methylfolate, calcium)	400 mcg DFE	100%
Proprietary Nitric Oxide Blend Beet root powder (Beta vulgaris), hawthorn berry extract (Crataegus laevigata), L-citrulline, sodium nitrite.	425 mg	†
† Daily Value not established		

Other Ingredients: mannitol, xylitol, modified cellulose, magnesium vegetable stearate, natural flavor, silica, and stevia leaf extract.

US Patent #8303995

Suggested Use: You may take up to 2 tablets per day during the restoration-loading phase. Take each tablet 12 hours apart. After 30-45 days, take only one tablet daily. Place one tablet in your mouth, dissolve or chew, and swallow. Do not place under tongue or swallow whole. Hydrate before and after taking to avoid mouth sensitivity.

Increasing Nitric Oxide Production is a Powerful Way to Support Healthy Aging

Having too little N-O is related to a host of cardiovascular issues, including unhealthy blood pressure. Though diet and exercise can help combat low nitric oxide production, they alone are unlikely to fully restore normal nitric oxide levels in older adults. Neo40 Pro can help.

Nitric oxide supports endothelial function

The endothelium forms a layer of cells lining your blood vessels & heart, which helps control vascular relaxation & contraction. Diminishing Nitric Oxide levels can result in this delicate system breaking down over time. N-O helps keep the endothelium healthy, while a healthy endothelium produces more N-O.

The Only Nitric Oxide Lozenge Licensed from the University of Texas

A clinical strength formula only available through qualified practitioners.

Beet Root Powder

Non-GMO, USA-grown beet root powder is clinically demonstrated to be one of the richest whole food source of dietary nitrates, which your body converts to Nitric Oxide.

Hawthorn Berry Extract

Contains high levels of antioxidants (polyphenols) that help activate the key enzyme eNOS, which helps your body quickly convert L-arginine to Nitric Oxide. It also helps reduce nitrite to Nitric Oxide.

5-MTHF

5'-Methyltetrahydrofolic acid is used in the synthesis of BH4 and maintaining sufficient levels of this very important co-factor is necessary for proper function of eNOS. If the level of tetrahydrobiopterin is not maintained the enzyme becomes uncoupled and generates free radicals rather than N-O.

Sodium Nitrite

Is quickly converted to N-O by Hawthorn Berry Extract and has clinically significant vasodilator activity.

L-citrulline

L-citrulline is an effective substitute source for L-arginine, which eNOS converts to Nitric Oxide. Also, L-citrulline is an inhibitor of arginase, which removes L-arginine from the circulation which reduces N-O production.

Vitamin B12

Reduces direct inhibition of eNOS by homocysteine and production of asymmetrical dimethyl-arginine (ADMA), and helps replenish tetrahydrobiopterin.

Vitamin C

Helps prevent removal of Nitric Oxide by free radicals, as well removes free radicals that inhibit eNOS.

The first dual-acting nitric oxide activator in the world

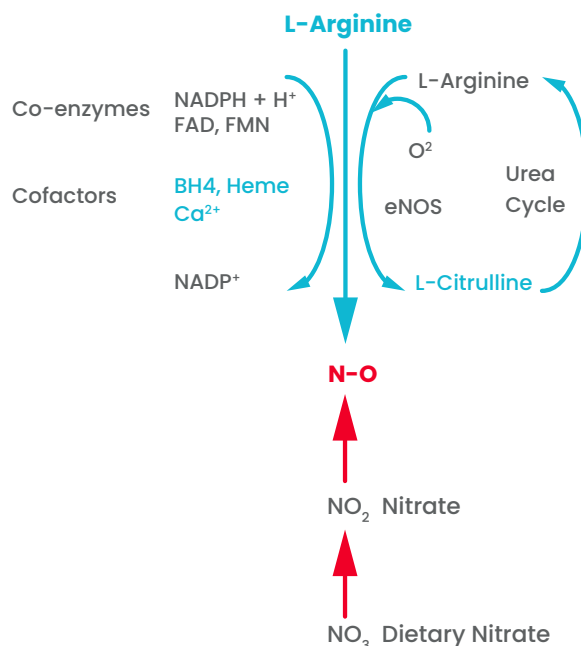

- Generates N-O by activating endothelial nitric oxide synthase (eNOS)
- Increases N-O production by the reduction of nitrite to N-O
- Maintains tetrahydrobiopterin (BH4) levels necessary for activation of eNOS and N-O production
- Protects eNOS from inhibition by free radicals and other inhibitory metabolites (ADMA and SDMA)

Enzymatic Process

Neo40 Pro is formulated to activate and preserve eNOS for rapid and consistent N-O production

Nitrate Reduction Process

Neo40 Pro is formulated to facilitate and accelerate the process
